

Mohammed Dabo

Senior Software Engineer · .NET · Microservices · Full-stack · DevOps

Riyadh, Saudi Arabia · mohammed.dabo@hotmail.com · +(966)538604774 · [linkedin.com/in/m1dabo](https://www.linkedin.com/in/m1dabo) · github.com/m1dabo · m1dabo.github.io

SUMMARY

Senior Software Engineer at the Zakat, Tax and Customs Authority (ZATCA) in Riyadh since October 2021. I build enterprise .NET platforms — distributed microservices, REST APIs, Entity Framework on MSSQL, and Redis — and Angular, React, and TypeScript clients, with Azure DevOps taking them to production. Earlier roles: Senior Software Engineer at ArabDT, Software Engineer at Edge-Pro for Information System, and Full-Stack Software Developer at Cloud Soft.

Hands-on skills: C# / .NET / .NET Core, Entity Framework, microservices, REST, MSSQL, Azure DevOps, Redis, Angular, React, TypeScript, Docker, Git, Python, Java, and Kubernetes. The same list includes AI agents, LLMs, and RAG, data engineering (ETL and pipelines), and DevOps and SRE habits for releases and production care.

EXPERIENCE

Senior Software Engineer · Zakat, Tax and Customs Authority (ZATCA) Oct 2021 – Present · Riyadh, Saudi Arabia

- Spearheaded end-to-end delivery of complex change requests including configurable baseline limits and asset retirement workflows, accelerating time-to-market by 15%.
- Architected a high-availability 3-node Redis master-replica cluster with Sentinel failover monitoring, cutting server response times by 40% and database load by 30%.
- Developed over 15 distributed microservices using enterprise .NET and modern frameworks, improving system scalability and performance by 30%.
- Engineered enterprise workflows using SAP Cloud Integration (CPI) with custom Groovy scripts and XPath mapping, reducing integration friction by 20%.
- Maintained 15+ production servers ensuring 99.9% uptime, automated deployments via Azure DevOps CI/CD pipelines and self-hosted build agents, and led cross-platform Expo React Native and Angular migrations.

Senior Software Engineer · ArabDT Jun 2020 – Sep 2021 · New Cairo, Egypt

- Engineered a scalable distributed microservices architecture handling 200% traffic growth with 100% uptime, robust RESTful APIs, and 20% higher customer satisfaction.
- Delivered high-throughput SaaS microservices for 20+ enterprise clients, boosting system efficiency by 25% while cutting downtime by 40%.
- Designed database-driven permission architectures and refactored static administrative roles, boosting project delivery efficiency by 20%.

Software Engineer · Edge-Pro for Information System Oct 2018 – Jun 2020 · Cairo, Egypt

- Engineered Egypt ASSETS web applications using modern full-stack technologies, achieving an 80% increase in user engagement.
- Managed on-premise application deployments in client environments, ensuring a 90% improvement in deployment efficiency.
- Integrated Hexagon tools (ERDAS Imagine, M.App Enterprise) to streamline geospatial workflows and reduce processing time by 25%.

Full-Stack Software Developer · Cloud Soft Apr 2018 – Sep 2018 · Cairo, Egypt

- Optimized UI rendering performance by 20% through frontend modernization and responsive design practices.
- Accelerated backend response reliability by 30% via robust database and system tuning.
- Accelerated product delivery cycles by 40% via full-stack technology adoption and agile workflows.

SKILLS

Backend: C#, .NET / .NET Core, Entity Framework / EF Core, Microservices, REST, Java, Python

Data: MSSQL, Redis, ETL & data pipelines, MySQL, PostgreSQL, Oracle

Front-end: Angular, React, TypeScript, JavaScript, Expo React Native, HTML, CSS, Tailwind

DevOps & SRE: Azure DevOps, Docker, Kubernetes, Git, CI/CD pipelines, SRE habits

AI: AI agents, LLMs, RAG

Testing: xUnit, .NET unit testing, Jasmine

Also used: C, C++, Go, Node.js, SOAP, GraphQL (basic), Spring, Gin, Beego, Ionic, jQuery, Bootstrap, Materialize, Jenkins, CircleCI, AWS, Microsoft Azure, SAP CPI

EDUCATION

Bachelor of Computer and Information Sciences, minor in Software Engineering · Ain Shams University, Cairo, Egypt · 2017
