SUMMARY

Senior Software Engineer focused on high-availability architecture, distributed microservices, and end-to-end delivery. Builds .NET APIs and Angular, React, and Expo React Native clients, and runs them with Redis Sentinel, Azure DevOps, and database optimization, including SAP Cloud Integration workflows, client migrations, and production support on 15+ servers.

EXPERIENCE

Senior Software Engineer

JCCS · SSIS · PaTeXs — Client: ZATCA (Zakat, Tax and Customs Authority) **October 2021 - Present, Riyadh, Saudi Arabia**

- Vendor placements for ZATCA: PaTeXs Oct 2021–Nov 2024, SSIS Dec 2024–Nov 2025, JCCS Dec 2025–Present.
- Developed 15+ distributed microservices on enterprise .NET and modern frameworks, improving system scalability and performance 30% across production services.
- Architected a high-availability 3-node Redis master-replica cluster with Sentinel failover monitoring, cutting server response times 40% and database load 30%.
- Delivered complex change requests end to end, including configurable baseline limits and asset-retirement workflows, shortening time-to-market 15%.
- Maintained 15+ production servers at 99.9% uptime, automated deployments with Azure DevOps CI/CD and self-hosted build agents, and led Expo React Native and Angular client migrations.
- Engineered enterprise workflows on SAP Cloud Integration with custom Groovy scripts and XPath mapping, reducing integration friction 20%.

Senior Software Engineer

ArabDT **June 2020 - September 2021, New Cairo, Cairo, Egypt**

- Engineered a scalable distributed microservices architecture that handled 200% traffic growth at 100% uptime, with REST APIs that raised customer satisfaction 20%.
- Delivered high-throughput SaaS microservices for 20+ enterprise clients, raising system efficiency 25% and cutting unplanned downtime 40%.
- Designed database-driven permission architectures and refactored static administrative roles, raising project delivery efficiency 20%.

Software Engineer

Edge-Pro for Information Systems **October 2018 - June 2020, Cairo, Egypt**

- Built Egypt ASSETS web applications with modern full-stack technologies for client users, raising user engagement 80%.
- Managed on-premise deployments in client environments and kept releases repeatable, improving deployment efficiency 90%.
- Integrated Hexagon geospatial tools, including ERDAS Imagine and M.App Enterprise, into the application workflow and cut processing time 25%.

Full-Stack Software Developer

Cloud Soft **April 2018 - September 2018, Cairo, Egypt**

- Modernized the frontend and responsive layouts across the product screens, lifting UI rendering performance 20%.
- Tuned the database and supporting systems behind the application, raising backend response reliability 30%.
- Introduced full-stack practices and an agile delivery workflow for the team, cutting product delivery cycles 40%.

EDUCATION

Bachelor of Computer and Information Sciences

Minor in Software Engineering • Ain Shams University • Cairo, Egypt · Sep 2013–Jun 2017 • June 2017

SKILLS

Core Technologies: C#, ASP.NET, .NET / .NET Core, Entity Framework / EF Core, TypeScript, JavaScript, service-oriented backends

Clients: Angular, React, Expo React Native, Ionic, HTML, CSS, Bootstrap, Tailwind

APIs and integration: REST, SOAP, GraphQL (basic), SAP Cloud Integration (CPI), Groovy, XPath

Architecture: Distributed microservices, high-availability design, Redis Sentinel (master-replica failover), automated release pipelines

Delivery: Azure DevOps CI/CD, Azure, AWS, Docker, Kubernetes, Jenkins, CircleCI, Git; xUnit, Jasmine. AI: Generative AI, Retrieval-Augmented Generation (RAG), LLM application development, Agentic AI

Familiar With: Java, Python, Node.js, Go, C, C++

Data: SQL Server, PostgreSQL, MySQL, Oracle; Relational Database Architecture, Query Optimization, High-Availability Data Systems; ETL and data pipelines
